

MAINTENANCE SCHEDULE VOLLEYBALL SYSTEMS

The following procedures should be performed not less than one time per year to insure continued proper operation of the volleyball system.

1. Check all set screws, nuts and bolts on the unit to insure that none have worked loose.
2. Floor sleeves should be kept clean of debris that may prevent insertion of post.
3. Floor covers should be checked for proper operation to insure that they open and close correctly. Broken or damaged covers should be immediately replaced to prevent injuries.
4. Check for any tears in the net. If tears are present, patch or repair immediately to prevent further damage.
5. Check for abnormal wear (i.e. fraying) in the net cables or winch belt. Should severe wear be detected, discontinue use immediately and contact your dealer or sales representative.
6. Clean pads with mild detergent and water or any off-the-shelf vinyl cleaner.
