

# 503003 Portable Height Adjuster Operator

## Specifications – #503003 Portable Height Adjuster Operator

### Product Description

Portable operator for manual height adjusters shall be the #503003 portable height adjuster operator by Progressive Sports Construction Group.

Portable operator shall consist of battery-powered cordless drill style winder with a Crank Hook to permit operation of Progressive Sports Construction Group #503092 & #503094 Manual Height Adjusters.

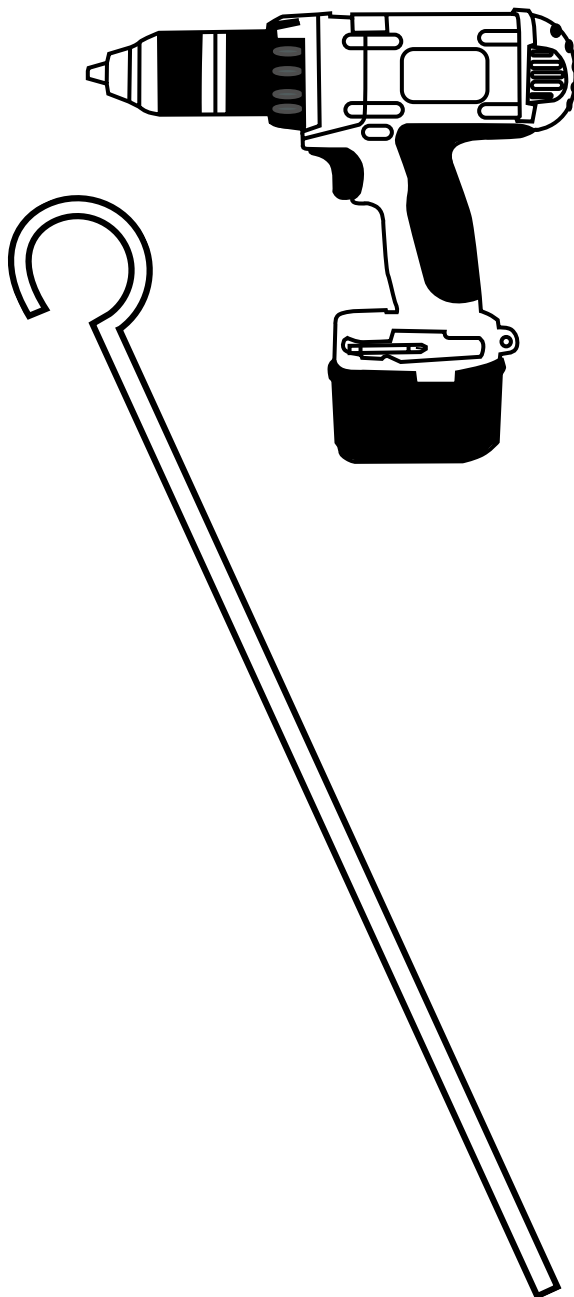

Crank Hook is fabricated using ½" diameter round stock. End is formed into hook that securely fits into the loop at the end of the threaded rod assembly on all Progressive Sports Construction Group Manual Height Adjusters. Crank Hook is 48" long and has flat sides at the bottom to insure it does not rotate in the drill style winder's chuck. Crank Hook features a durable black powder coat finish.

Drill style winder is UL listed and is supplied with auxiliary handle, carrying case, charger and two one-hour batteries. Drill style winder has been modified to lock the operation in low speed (450 RPM) and has an adjustable clutch mechanism to prevent damage to the threaded rod assembly due to excessive RPMs, over-cranking or inadequate lubrication.

NOTE: Never operate height adjusters with a standard drill or portable winch operator. Use of such a unit may result in bodily injury and/or damage to the height adjuster.
